**Statistical Release BOP/2/2025**

# **Quarterly Balance of Payments**

## **Second Quarter, 2025**

## Balance of Payments

Table 1 shows Kenya's Balance of Payments from the second quarter of 2023 to the second quarter of 2025. The current account balance worsened by 76.6 per cent to a deficit of KSh 83.7 billion in the second quarter of 2025 from a deficit of KSh 47.4 billion recorded in the same quarter of the previous year. This was primarily driven by 11.7 per cent widening of the merchandise trade deficit to KSh 348.4 billion during the corresponding period. The expanded merchandise trade deficit was mainly due to 16.5 per cent decline in exports, which was relatively faster compared to 4.5 per cent decrease in imports over the same period. Further, net inflows in the services account contracted from a surplus of KSh 70.8 billion in the second quarter of 2024 to a surplus of KSh 65.5 billion in the corresponding quarter of 2025. This was mainly as a result of KSh 12.0 billion increase in services expenditure compared to KSh 6.6 billion increase in services revenue in the period under review.

Conversely, the net primary and secondary income accounts showed improvement during the review period. In the second quarter of 2025, the deficit in the primary income account narrowed to KSh 43.8 billion from KSh 45.2 billion during a similar quarter of 2024, while the surplus in the secondary income account increased to KSh 243.1 billion from KSh 238.8 billion over the same period. The Improvement in the secondary income account was partly boosted by 7.3 per cent rise in diaspora remittances to KSh 168.9 billion in the second quarter of 2025.

During the second quarter of 2025, net inflows in the financial account increased substantially to KSh 136.5 billion from KSh 35.7 billion in the second quarter of 2024. This was partly attributable to net inflows recorded in the Portfolio Investment category in the quarter under review compared to net outflows registered in the same category during the previous quarter. The stock of gross official reserves increased by 40.0 per cent to KSh 1,534.8 billion in the second quarter of 2025 partly occasioned by KSh 157.0 billion build up in reserve assets during the quarter under review. The overall Balance of Payments position improved significantly to a surplus of KSh 157.0 billion in the reference quarter of 2025, from a surplus of KSh 84.1 billion of the corresponding quarter of 2024.

## Stock of External Debt Liabilities of General Government

The stock of external debt of the general government increased from KSh 5,404.7 billion at the end of June 2024 to KSh 5,684.9 billion at the end of June 2025, as presented in Table 2. Similarly, the stock of loans rose from KSh 4,217.4 billion at the end of June 2024 to KSh 4,382.5 billion at the end of June 2025 and accounted for 77.1 per cent of the total stock of external debt of the general government. Multilateral sources accounted for 69.5 per cent, the largest share of stock of loans, and increased by 9.3 per cent to KSh 3,045.4 billion at the end of June 2025. However, the stock of loans from both bilateral and commercial sources declined by 5.5 per cent and 10.4 per cent to KSh 1,032.8 billion and KSh 289.9 billion, respectively at the end of June 2025.

The stock of debt securities increased to KSh 1,302.4 billion at the end of June 2025, from KSh 1,187.4 billion at the end of June 2024. The was partly due to an increase of 19.6 per cent in the stock of International Sovereign Bond to KSh 1,022.7 billion at the end of June 2025. Similarly, treasury bills increased from KSh 2.9 billion at the end of June 2024 to KSh 3.6 billion at the end of June 2025. Conversely, the stock of treasury bonds owned by non-residents declined from KSh 329.6 billion at the end of June 2024 to KSh 276.1 billion at the end of June 2025.

\*Provisional

By convention, guaranteed debt is a contingent liability, hence recorded as a memorandum item.

The figures might differ from the stock of debt captured in the QEBR under Public & Publicly guaranteed External Debt due to inclusion of domestically issued debt held by non-residents and which has been revised from September, 2023.

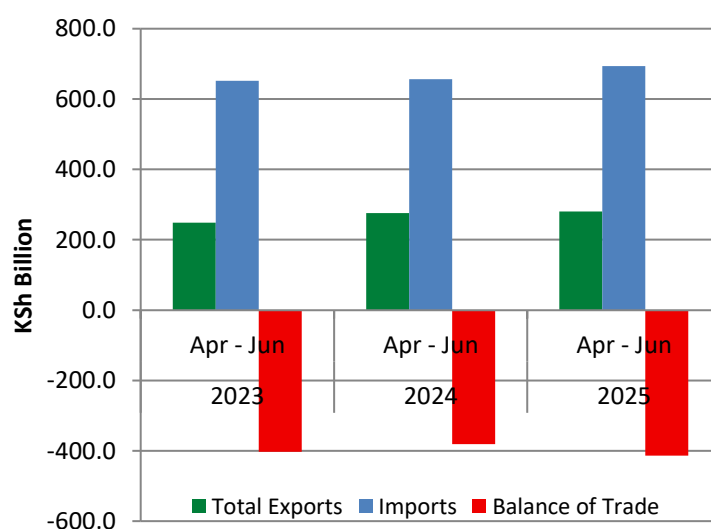

Debt issued by non-residents is recognized as external irrespective of the currency in which the debt is denominated or issued and vice versa.

Holdings of local currency by non-residents is always a liability of the local commercial banks

## International Merchandise Trade

Volume of trade in the second quarter of 2025 was valued at KSh 973.6 billion, representing an increase of 4.5 per cent from the same quarter of 2024. The growth was driven by increase in both total exports and imports as presented in Figure 1 and Table 3. Specifically, total exports amounted to KSh 280.0 billion translating to an increase of 1.7 per cent, while the value of imports were valued at KSh 693.6 billion. The trade deficit widened from KSh 380.7 billion in the second quarter of 2024 to KSh 413.5 billion in the quarter under review, primarily due to an accelerated growth of imports compared to that of total exports.

## Value of Domestic Exports

In the second quarter of 2025, revenue from domestic exports grew by 12.8 per cent compared to the same quarter of 2024. The growth was largely on account of increase in exports of coffee; horticultural products; articles of apparel and clothing accessories; and animal and vegetable oils which rose by 69.0, 19.1, 18.8 and 53.5 per cent, respectively, as shown in Figure 2 and Annex 1.

Despite the overall rise in export value, foreign exchange earnings from titanium ores and concentrates fell sharply, mainly due to the depletion of mineral deposits in Kwale. Moreover, volume of exported salt and cement declined from 157.9 thousand metric tonnes and 97.1 thousand metric tonnes in the second quarter of 2024 to 113.4 thousand metric tonnes and 56.0 thousand metric tonnes, respectively, in the quarter under review, as presented in Annex 2.

**Figure 2: Value of Selected Domestic Export Commodities, 2<sup>nd</sup> Quarter, 2023-2025**

Exports of food and beverage, by Broad Economic Category (BEC) classification, contributed 45.0 per cent of the total domestic export earnings in the period under review, primarily supported by domestic exports of primary industrial food and beverages, as highlighted in Annex 7. In contrast, there was a decline in domestic exports of commodities under the subcategory of primary non-food industrial supplies which contracted from KSh 17.9 billion in the second quarter of 2024 to KSh 12.0 billion in the second quarter of 2025.

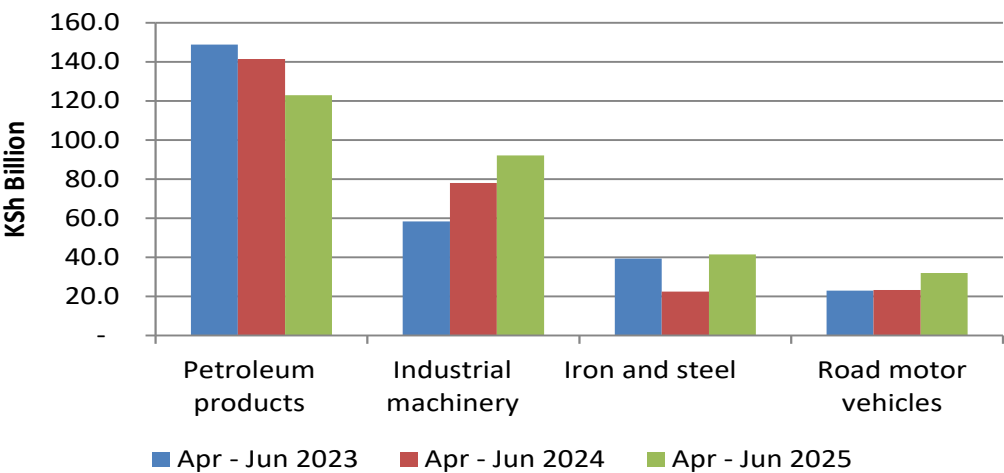

### **Value of Imports**

Import expenditure in the second quarter of 2025 amounted to KSh 693.6 billion compared to KSh 656.0 billion incurred in the second quarter of 2024, translating to a 5.7 percentage increase. The growth was primarily driven by increase in imports of industrial machinery (18.0%), iron and steel (84.0%), sugars, molasses and honey (56.9%), and road motor vehicles (38.0%), as highlighted in Figure 3 and Annex 3. On the other hand, imports of petroleum products, chemical fertilizers, medicinal and pharmaceutical products and unmilled wheat exhibited declines of 13.2, 38.2, 12.0 and 15.5 per cent, respectively, over the same period.

Analysis of imports by Broad Economic Category (BEC), showed that the bulk of import bill in the second quarter of 2025 was attributable to non-food industrial supplies category with a share of 36.0 per cent. Notably, import expenditure to this category rose from KSh 224.0 billion in the second quarter of 2024 to KSh 249.7 billion, as shown in Annex 8. Similarly, there was a significant increase in imports of transport equipment from KSh 52.6 billion in the second quarter of 2024 to KSh 72.2 billion in the review period.

On the other hand, import expenditure on fuel and lubricants was valued at KSh 139.8 billion, reflecting a decline of 11.7 per cent compared to the corresponding quarter of 2024. The decline was partly on account of decreased imports of processed fuel and lubricants, and changes in international commodity prices.

**Figure 3: Value of Selected Import Commodities, 2<sup>nd</sup> Quarter, 2023-2025**

## Direction of International Merchandise Trade

In the second quarter of 2025, total export receipts amounted to KSh 280.0 billion, representing an increase of 1.7 per cent from the second quarter of 2024 as presented in Annex 5. Africa remained Kenya's largest export market, contributing 37.7 per cent of total export earnings in the quarter under review. Revenue from exports to the region grew by 6.8 per cent to KSh 105.7 billion, supported by increased exports to Uganda (16.3%), the Democratic Republic of Congo (21.6%), and Egypt (25.2%). The improvements were largely due to increased domestic exports of potatoes to Uganda, lubricants to the Democratic Republic of Congo and tea to Egypt. Conversely, there was a reduction in domestic exports of food preparation for infants to South Sudan, partly contributing to the overall decline in export earnings from this destination.

Exports to Europe recorded an increase of 21.4 per cent to KSh 72.5 billion, bolstered by increased exports to the Netherlands (13.4%), Belgium (85.9%) and Germany (33.9%). Specifically, domestic exports of cut flowers to The Netherlands, and coffee to Belgium and Germany increased.

Similarly, shipments to the Americas improved by 4.5 per cent to KSh 22.6 billion, partly driven by increased domestic exports of coffee to Canada. Despite the overall growth in export revenue from this region, there was remarkable decrease in exports to the United States of America, resulting from reduced domestic exports of articles of apparel and clothing accessories.

In contrast, over the same period, foreign exchange earnings from exports to Asia contracted to KSh 73.5 billion from KSh 91.7 billion recorded in the second quarter of 2024. The decline was majorly occasioned by decreased re-exports of kerosene type jet fuel to the United Arab Emirates and Saudi Arabia; and domestic exports of titanium ores and concentrates to China.

Value of imports in the second quarter of 2025 went up 5.7 per cent to KSh 693.6 billion from KSh 656.0 billion in a similar period of 2024. The growth was mainly driven by increased imports from Asia and Africa as shown in Annex 6. Asia remained the dominant source of Kenya's imports, amounting to KSh 461.1 billion up by 6.2 per cent, buoyed by increased imports from China (18.9%), India (25.7%), Japan (41.1%), and Malaysia (9.4%). In particular, there was increased imports of crushing/grinding

machines and iron and steel from China; gas oil and wheat and meslin from India; motor vehicles from Japan; and crude palm oil from Malaysia. However, over the same period there were notable declines in the value of imports from Saudi Arabia (49.0%) and United Arab Emirates (4.5%).

On the Europe front, the value of imports fell by 20.3 per cent, from KSh 105.6 billion in the second quarter of 2024 to KSh 84.1 billion. The sharpest contraction in import bill was from the Russian Federation which declined from KSh 25.6 billion in the second quarter of 2024 to KSh 5.6 billion in the quarter under review. The decline was largely on account of reduced importation of wheat and meslin from this source. Similarly, there were notable decline in import expenditures from The Netherlands (58.7%) and France (19.8%). On the contrary, there were remarkable increase in imports from Belgium and Poland which rose by 26.1 per cent and 57.6 per cent, respectively.

During the quarter under review, imports from Africa expanded to KSh 73.4 billion, reflecting an increase of 18.9 per cent from the second quarter of 2024. The rise in import bill was partly due to increased imports of sugar from Uganda; essential oils from Eswatini; and iron and steel from South Africa. However, the growth was partly slowed due to decreased imports of chemical fertilizers and rice from Tanzania.

Import bill from the Americas reached KSh 55.9 billion, reflecting a 7.7 percentage increase in the second quarter of 2025, supported by substantial growth from Canada which rose from KSh 2.9 billion to KSh 7.0 billion in the quarter under review. Specifically, there was an increase in imports of helicopters from this source. Despite the growth in import bill from this region, import expenditure from the United States of America dropped by 4.5 per cent to KSh 35.3 billion in the period under review, largely due to decreased imports of helicopters; turbo jets; soya bean oils and its fractions; and machines for the reception, conversion and transmission or regeneration of voice, images or other data, including switching and routing apparatus.

In addition, import expenditure from Australia and Oceania surged to KSh 18.0 billion, representing an increase of more than eleven-fold from second quarter of 2024. The rise was largely on account of increased importation of wheat and meslin from Australia.

## ANNEXES

### Annex 1: Value of Domestic Exports of Principal Commodities<sup>1</sup>, 2023– 2025
